

# DM8 Pharmaceutical Inspection

## Features

- Lightest tension rewriter on the market
- Total minimum tension of 0.3 lbf [0.136 Kgf]
- Integrated ANSI barcode grading system
- Return-to-Defect
- Intuitive touchscreen controls with unlimited recipes
- Two-motor smart AC Vector drive system
- CompactLogix PAC Control
- Reversible over/under winding
- Other inspection options available
- Internet based remote diagnostic with WiFi capability

# Stanford / DM8 Pharmaceutical Inspection Doctor Machine®

## Pharmaceutical Label Inspection...

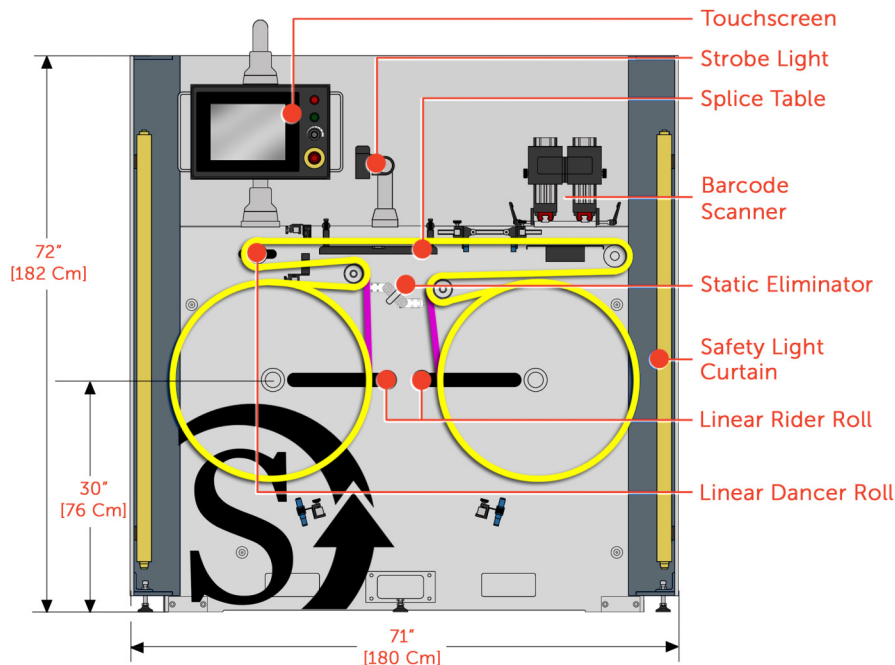

is the specifically designed purpose for the DM8. With carbon-fiber rollers, unique linear rider roll and dancer control systems, the fully cantilevered machine has the ability to run web widths as narrow as 15 mm (0.59") with speeds up to 1,500 fpm (457 mpm).

An integrated laser barcode scanning systems provides ANSI grade barcode inspection, barcode matching, and barcode read verification. If a poorly printed barcode is detected, the machine will automatically stop and reverse the web until the defective print is on the splice table. All labels are inspected again before rewinding.

Features such as the safety curtain and ergonomic design make the DM8 an ideal choice for any pharmaceutical labeling facility.

Accraply engineers a large selection of Stanford Doctor Machines®, a complete line of duplex differential slitter rewinders and shrink sleeve finishing equipment, as well as customized equipment.

Minimum Web Width	0.59" [15 mm]
Maximum Web Width	8" [203mm]
Maximum Web Speed*	1,500 fpm [457 mpm]
Maximum Unwind Diameter	24" [610 mm]
Maximum Roll Weight	200 lbs [91 Kg]
Maximum Rewind Diameter	24" [610 mm]
Tension	0.5 PLI [0.08 Kg/cm]
Total Minimum Tension	0.03 lbf [0.136 Kgf]
Machine Options	

\* Max speed is a function of the material characteristics (including COF, coatings, ink adhesion, curing, and drying), gauge bands, tension and web width.
