

Automated Vacuum Drum Cleaning Kit

Designed to contribute to uptime efficiency while reducing the need for manual operator intervention, the Trine Automated Vacuum Drum Cleaning Kit allows for the cleaning of Trine 4000 series vacuum drums during production without the need to open the safety guard doors.

Features & Benefits

- Utilizes a compact design and simple controls, including remote control, to automate the process of vacuum drum cleaning for optimal label handling.
- Administers Zep® Slide™ silicone lubricant to vacuum drum with the push of a button.
- Uses a felt brush to gently remove residual glue from vacuum drum.
- Saves time and money by reducing costly production downtime.
- Offers both an automatic option as well as a manual mode to deliver optimal vacuum drum cleaning for every situation.
